Elias Thomas

949-735-1727 | ecthomas05@gmail.com | elithomas.dev | in/eli-thomas | github/eliThomass

Education

California State University, Fullerton — Fullerton, CA
B.S. in Computer Science, Cybersecurity Concentration — GPA: 3.89 / 4.0 — *Aug. 2023 – Present*
Expected Graduation: May 2027
Relevant Courses: Software Engineering, Data Structures & Algorithms, Files & Databases, Front End Engineering

Experience

Software Engineering Intern, Agentic AI — June 2026 – Aug. 2026
Ingram Micro — *Irvine, CA*

- Designed and shipped a full-stack human-in-the-loop review application (**React** + Vite SPA, **FastAPI**, **PostgreSQL**, Google Cloud Storage) that gates LLM-generated technical specifications before ingestion into a **475-node** enterprise **Neo4j** knowledge graph; owned end to end and demoed to **20+** engineers.
- Built the security layer for a production LLM orchestrator — role-based access control at the tool boundary, **NVIDIA NeMo** input/retrieval/output guardrails, PII masking, and a correlated per-turn audit trail — refusing prompt-injection and unauthorized tool calls before they reach the model.
- Instrumented multi-agent systems with **Datadog** LLM observability and token-level cost metering, exposing per-call spend, traces, and evaluation scores, including a custom context-density metric and semantic-search similarity evals scored against live graph retrieval output.
- Developed and deployed the **React**/Material UI frontend for an order-hold automation agent on an order management platform handling **hundreds of millions of dollars** in orders and generating **billions** in revenue.

Algorithm Officer — June 2025 – Present
Association for Computing Machinery (ACM) — *Fullerton, CA*

- Lead weekly workshops on fundamental data structures and algorithms for 40+ students, delivering over **10** sessions on topics including arrays, trees, and graphs.
- Develop and present a curriculum of **30+** LeetCode-style problems to strengthen members' problem-solving abilities and prepare them for technical interviews.
- Provide targeted one-on-one mentorship during workshops, providing guidance on effective debugging, professional coding practices, and advanced algorithmic thinking.

Barista — Oct. 2023 – Present
Starbucks Coffee Company — *Ladera Ranch, CA*

- Provide exceptional customer service in a fast-paced environment, serving **500+** customers per day.

Projects

Distributed Signal Capture for Multi-Node Analysis — Sept. 2026 – Present
Sponsored by Raytheon Applied Signal Technology — *Wi-Fi/BLE, Raspberry Pi, Device Fingerprinting*

- Lead a **5**-person team building a system that detects and locates nearby recording devices (Meta smart glasses, Ring, body, and hidden cameras) from passively captured **Wi-Fi** and **Bluetooth** signal metadata.
- Designing **Raspberry Pi** capture nodes and backend services for device fingerprinting, **RSSI**-based location estimates, and detecting whether a device is actively recording.
- Run the team's Agile process across four 2-week sprints with scoped user stories and PR review.

Air Quality Monitoring System [Github] | *C++, ESP32, Django, MySQL, React* — Jan. 2026

- Developed an end-to-end IoT system using an **ESP32** and **BME680** sensor to monitor VOCs, CO2 equivalents, temperature, and humidity in real-time.
- Built a **Django** backend with a **MySQL** database to ingest and store sensor data.
- Designed a responsive **React** dashboard to visualize environmental trends and historical data.

Technical Skills

Languages: C++, Python, JavaScript/TypeScript, SQL, HTML/CSS, Assembly
Frameworks & Libraries: React.js, FastAPI, Django, SQLAlchemy, Material UI, Google ADK, NeMo Guardrails
Databases & Platforms: PostgreSQL, MySQL, Neo4j, Google Cloud Platform, Supabase, Vercel, Linux
Concepts & Protocols: REST APIs, WebSockets, JWT, RBAC, Model Context Protocol, LLM Evals, TCP/IP, HTTP
Developer Tools: Git, Bitbucket, Confluence, Jira, Datadog, Docker, Vite, pytest, VS Code, Vim, Agile Methodology
